SECONDARY DIVISION
for students completing grades 7-11

JUNE 18 - JULY 27
2018
OVER THE PAST 37 YEARS, students have come to the UC Berkeley campus each summer to pursue architecture, computer programming, law, geometry, biotechnology, and so much more. Whether your family has a long tradition across generations at ATDP or whether you seek to join ATDP for the first time, welcome.

Over the decades, our goals have always remained the same: to welcome youth from all backgrounds into an academic community; to help our students to think and understand deeply; to encourage them to rise rapidly through levels of study. We offer courses appropriate to our students’ needs, taught by outstanding public and private school instructors, as well as university researchers and industry professionals.

We also endeavor to learn more about academically talented students: how they develop, what they require in order to learn at their optimal pace and to their appropriate depth, and what factors support or impede their social development. Toward that goal, we sometimes ask our students and their families to participate in research studies and we solicit their insights and evaluations.

Our application process reflects our belief that students must be given the opportunity to present their strengths in a variety of ways. By requiring applicants to submit multiple indicators of their academic achievements, we are able to identify and admit a diverse group of the hardest-working, highest-achieving students. As you consider the wide range of classes offered in this year’s catalog, we hope that you will find many that spark your interest.

Thank you for your interest in ATDP.

Sincerely,

Lisa Kala
Program Director

Frank C. Worrell
Faculty Director

PROGRAM DATES
June 18 to July 27, 2018
See back cover for important dates & deadlines

LOCATION
UC Berkeley campus

WEEKLY SCHEDULE
2 or 3 days per week (see course index, p. 4)

DAILY SCHEDULE
Morning classes: 8:30 a.m. to noon
Afternoon classes: 1:00 to 4:30 p.m.

FEES
Application processing fee: $50
5-unit courses: $650 - $800
10-unit courses: $950 - $1100
AP Biology: $1500

DISCOUNTS
Sibling discount: $35 per sibling attending
Limited need-based financial aid is available
See p. 14 for details

Or drop by our office between 9:30 and 5; we welcome visitors!

University Hall is located at 2199 Addison St. in Berkeley.
Classes are held in buildings across the UC Berkeley campus, including Berkeley Way West: the new home of the Graduate School of Education starting late Spring.

ATDP’s Secondary Division, administered through UC Berkeley’s Graduate School of Education, offers challenging courses to highly motivated students who have completed Grades 7-11 (and are entering Grades 8-12). Students are invited to attend the program on the basis of exceptional academic talent.

ATDP’s course offerings cover a wide variety of disciplines. Instruction is fast-paced, and expectations are high—each six-week course is designed either to cover a semester’s worth (5 units, or 7.5 school days per class session) or a year’s worth (10 units, or 10 school days per class session) of material. The number of hours of homework per ATDP class session is commensurate with the number of school days that the class covers and is provided below each course description on pp. 5-12.

ATDP is committed to supporting gender, ethnic, and socioeconomic diversity in all of its programs.

WHO ARE ATDP STUDENTS?

ATDP’s goal is to select students who will benefit from the challenging course offerings and will succeed in this fast-paced program. Students are eligible to attend ATDP’s Secondary Division once they complete Grade 7 and can return each summer through the completion of Grade 11. Students become ineligible for ATDP when they complete Grade 12.

On average, admitted students have scored in the advanced range on the California Standards Test (CST) or above the 90th percentile on a nationally standardized achievement test in both mathematics and English Language Arts or reading. Additionally, ATDP students tend to earn an overall academic grade point average (GPA) of at least 3.5 on an unweighted 4-point scale. Please remember that these are not hard-and-fast selection criteria, but rather general guidelines. Designation as “gifted” at your home school is not required for admission to ATDP. Students with marks of “unsatisfactory” or “needs improvement” in conduct or citizenship are not a good fit for the program.

LEARNING OUTCOMES

ATDP students...

■ rise rapidly through levels of study;
■ approach challenges with persistence and flexibility;
■ pursue mastery in their chosen disciplines;
■ participate actively in an academic community of similarly motivated peers; and
■ continue to apply the skills they develop outside the classroom.

WHO ARE ATDP FACULTY?

Our faculty include exceptionally talented public and private school instructors, as well as university researchers and industry professionals. In addition to their excellence as classroom instructors, they share a serious commitment to the education of gifted and talented youth. The low teacher-to-student ratio, as well as the counseling and administrative staff support, ensure instruction of the highest quality.

SEE ALSO:

ELEMENTARY DIVISION

For students completing Kindergarten through Grade 6, ATDP offers an exciting three-week program at Washington School in Point Richmond (9 miles NW of UC Berkeley).

July 9 - July 27, 2018
atdp.berkeley.edu/ed

All classes meet Mondays, Tuesdays, Thursdays and Fridays. Extended care options available.

Paper forms are attached between pages 10 and 11.
Unlike many other summer programs, ATDP offers courses that focus on acquisition of deep knowledge in a single topic. Secondary Division students are invited to immerse themselves and gain expertise in a subject that interests them. Some ATDP classes are designed to accelerate students through high school curricula. While ATDP does not provide credit for its courses, many high schools accept our recommendation of credit and will list ATDP classes on their transcripts.

Selecting a Course – p. 3
Course Index – p. 4
Course Descriptions – pp. 5-12

About ATDP Courses

SCHEDULE & SIZE
ATDP offers courses that meet either two or three days each week. Most run the full six weeks of the Secondary Division (June 18 - July 27), though a small number of 5-unit classes run on unique four-week schedules. Classes generally have a cap of 20 to 24 students.

WORKLOAD
An ATDP course requires a serious time commitment. Students should expect to spend between three and ten hours preparing for each class meeting. The average number of hours of homework to expect per class meeting is listed below each course description (pp. 5-12) and new students especially should expect to be spending time on homework that is at the upper end of the range provided.

CREDIT
ATDP recommends credit, but only the student’s school may grant credit for an ATDP course. Only courses that have been placed by the high school on the student’s high school transcript can be used to meet college entrance requirements. We mail a grade report to a student’s school upon the student’s request and only when credit is recommended. Any report that does not carry a credit recommendation is mailed only to the student’s home. (See “Final Evaluation,” p. 15.)

ATDP recommends high school credit for students who have demonstrated mastery of a course with a grade of A or B. For grades of C and below, we assign a Pass or No Pass mark with no credit recommendation. An ATDP course can be considered for honors-level credit. Advanced Placement courses at ATDP are identified as such in their titles and should also carry appropriate credit.

Please check with your principal or guidance counselor before applying if credit is a concern.

EXPLORATIONS
In addition to its regularly scheduled courses, ATDP offers through its Explorations program a selection of optional classes, workshops, and trips. These activities enrich Secondary Division students’ summer experience with opportunities to learn new skills, to pursue career-oriented interests, and to visit interesting places. Last year’s Explorations included tours of campus departments.

Explorations meet on various weekdays, often for a half-day. They vary in length and meet between one and six times. The Explorations program guide and enrollment form will be sent to students along with their notification of acceptance into ATDP. Only students currently enrolled in ATDP courses may attend Explorations.

NEW COURSES FOR 2018
These courses have never been held at ATDP before, and demand for these spots may be very high. As applications are evaluated in the order completed, we strongly recommend applying early!

Introduction to French (see p. 6)
AP Japanese Language & Culture (p. 6)
Visual Computing with Mathematical Constructions (p. 8)
Philosophy and Critical Thinking (p. 10)

RETURNING COURSES
These Secondary Division courses are back, and may include revisions and updated curricula for this summer:

AP Statistics (see p. 9)
AP Environmental Science (p. 12)
Selecting a Course

With nearly 40 different courses to choose from, it is sometimes difficult for students to find the one course that is just right for them! We encourage you to read through the course descriptions (pp. 5-12) to carefully identify a course that interests you and for which you are academically prepared. It is important to note course prerequisites and grade level requirements when you are selecting your course choices, as not all courses are open to all students. In addition to selecting the course that you are most interested in taking, you may select up to three other courses as alternatives.

CHOOSING A WRITING COURSE

Applicants sometimes have trouble figuring out which writing course is most appropriate for their skill level, age, and grade. Aside from creative writing, all of our writing courses share very similar learning goals, just at different levels. We recommend including all acceptable writing course alternatives on your application form. Based on your academic product, age, grade, and Letter of Interest, we will place you in the most appropriate class.

CHOOSING A MATH COURSE

Accelerated mathematics courses have rigid prerequisites and a special application process. These courses are marked with the symbol next to their descriptions on pages 8-9. See page 8 for details.

ADVANCED PLACEMENT

Courses designated as “Advanced Placement” are especially rigorous 10-unit courses designed to prepare students for the AP exam in the subsequent spring. Take special note of these courses’ prerequisites and anticipated homework time per class meeting.

APPLYING FOR TWO COURSES

Only students with strong academic backgrounds are allowed to take two courses, and new Secondary Division students (including those who previously attended ATDP’s Elementary Division) are less likely to be allowed to enroll in two courses. Remember that expectations are high in every ATDP course, and many former students have reported that taking two courses was more time-consuming than they expected. Add together the two courses’ Estimated Weekly Hours listed on page 4 for an approximate time commitment.

If you are interested in enrolling in two courses, you must petition to do so in your Letter of Interest that accompanies your application. The petition should explain your summer plan: clearly identify your desired alternatives (single courses or other two-course combinations) in order of preference. Also describe how you plan to manage time commitments outside of class meetings. Successful petitions trend to be for two 5-unit courses, or one 10-unit course with a lower time commitment and one 5-unit course.

Courses FAQ

I have only one course choice. Do I still have to list alternate classes on my application?

Each course you request represents a commitment on your part. If you would rather not come to the program than attend a course other than your first choice, you should request your first choice only.

Will I improve my chances of being placed in my first choice class if I don’t list alternates?

No. We always start by attempting to place a student in his or her first choice and only look at the alternates if the course is filled or if a student’s application is not competitive for his or her first choice.

Will my school accept ATDP’s recommendation of credit?

Many—but not all—high schools have accepted our recommendation in previous years. As school and district policies vary, make sure to check with your school’s administration first if you hope to receive credit for an ATDP course.

Do ATDP courses count towards college entrance requirements?

If your school has accepted ATDP’s recommendation of credit, it should appear on your high school transcript and will count towards college entrance requirements.

Is the time listed for homework accurate, or is that just how long it takes other students who aren’t as smart as I am?

The homework hours listed represent the average time to complete homework (not including studying) reported by the previous year’s classes. It is safe to expect that the amount of homework you do will be somewhere within the range given.
Course Index

See details for each course and course section in their respective descriptions on pp. 5-12. Updates can be found at atp.berkeley.edu/sd/catalog.

</table>

1. Open to this grade level
2. Recommended grade level
3. Denotes a course with requirements in addition to or instead of a grade level requirement. See course descriptions on pp. 5-12.
4. Estimated Weekly Hours indicates the approximate time commitment per week, including class sessions, homework, and study, based on reports from previous years' students.
5. AP Environmental Science meets 9:00 AM to 3:30 PM.
6. AP Biology meets 8:30 AM to 4:30 PM.
7. All other courses: AM sessions meet 8:30 AM to 12:00 noon. PM sessions meet 1:00 PM to 4:30 PM.
8. This is an accelerated math course with additional restrictions. Read its course description carefully. To apply, follow the instructions on page 8.
9. Public Speaking has sections divided by grade level. Section SD3850.1 & 50.2 meet on TuF and are open to students completing grades 6, 7, or 8 only. Section SD3850.4 meets on MTh PM and is open to students completing grades 9, 10, or 11 only.
10. These 5-unit courses have a compressed four-week schedule instead of the standard six-week Secondary Division schedule. See the individual course descriptions for the exact dates.

Each course is offered in one or more sections, listed on the following pages, as indicated at right (instructors listed as “Staff” are yet to be determined):
The Writing Process
SD3800.1 Tu & F 8:30 - 12:00 Paul Heller
SD3800.2 Tu & F 1:00 - 4:30 Paul Heller
This course is meant for students who are mastering their middle school writing skills and transitioning to high school. Students will investigate the purposes for which authors write and will become purposeful readers and writers. Lessons and activities will focus on the process of writing: pre-writing, drafting, editing, and revising. Students will work in editing groups, help each other revise drafts, and study the qualities of good writing. They will learn techniques for crafting well-written sentences, logical paragraphs, and coherent essays. Students will read, study, and discuss writing styles, and they will practice what they have learned in numerous writing assignments.

Homework per class meeting: 2-5 hours
Recommended credit: 5 units
Tuition: $650  ($570 base tuition + $80 facilities fee)

Reading for Creative Writing
SD3801 Tu & Th 8:30 - 12:00 Tyleen Kelly
This class will focus on reading critically and passionately and on fostering creative writing skills. Students will read poetry, short stories and other works of literature, and write responses to the readings. They will visualize the imagery and explore the themes of literature in relation to their own lives. For more inspiration, class activities may include drawing and art, campus explorations, and a visit to a local museum. Students will share their insights into the mind of the author and seek to understand their own writing processes. Through improvisation, class discussion, and writing exercises, students will learn to identify and experiment with various narrative techniques. They will develop a portfolio of their own creative writing and will also write one analytic essay that will reflect their growing expertise as readers and writers.

Grade Requirement: For students completing Grade 7 or 8.
Homework per class meeting: 2-4 hrs.
Recommended credit: 5 units
Tuition: $650  ($570 base tuition + $80 facilities fee)

Crafting Effective Essays
SD3803.1 M & Th 8:30 - 12:00 Gabriella Wyatt
SD3803.2 M & Th 1:00 - 4:30 Gabriella Wyatt
SD3803.3 M & Th 8:30 - 12:00 Staff
This class will provide a vehicle for students to sharpen their high school level reading and writing skills. Students will mold facts, speculations, beliefs, and opinions into cogent, powerful statements. Through readings, class discussions, and group work, students will learn how to develop arguments to answer complex questions and then support their original claims with sufficient and significant evidence. From carefully constructed paragraphs to complete essays, successive assignments will allow students to investigate different approaches to their writing. Emphasis will be on learning to refine thinking and on improving writing through outlining, editing and rewriting.

Homework per class meeting: 3-6 hrs.
Recommended credit: 5 units
Tuition: $650  ($570 base tuition + $80 facilities fee)

Advanced Creative Writing
SD3806 Tu & F 1:00 - 4:30 Alex Franklin
This course will focus on purposeful reading and developing advanced creative writing skills. Students will read short stories, poems, and a novel, discuss the form and purpose of meta-fiction, and revise their writing through class workshops before presenting their finished work. Students will revise and craft tone so that they can assure a reader, “This narrative came from a living, breathing, thinking being.” In their clever meta-narratives, students will also learn to be mindful not to trample on the purpose, message or content of their stories.

Grade Requirement: For students completing Grade 9 and up.
Homework per class meeting: 2-4 hrs.
Recommended credit: 5 units
Tuition: $650  ($570 base tuition + $80 facilities fee)

Advanced Literary Analysis
SD3808 M & Th 1:00 - 4:30 Jeffrey Neilson
This is a course for people who enjoy literature and analytic discussion so much that they want to become superb at these activities. Students will be expected to tackle complex works of literature with relish—texts will include fiction and poems, leading up to a Shakespeare play. Students will work not only at their analytic essay writing, but also at leading discussion. We will emphasize close reading and precise writing, and from this students’ own writing will emerge more fluidly with greater clarity and impact. The course is both preparation for reading literature in college and for doing well in AP English literature courses.

Grade Requirement: For students completing Grade 10 or 11.
Homework per class meeting: 2-5 hrs.
Recommended credit: 5 units
Tuition: $650  ($570 base tuition + $80 facilities fee)

Analytical Writing
SD3804.1 M & Th 8:30 - 12:00 Elizabeth Scherman
SD3804.2 M & Th 1:00 - 4:30 Jonathan Shelley
This course, taught at the advanced high school level, will allow students to strengthen their analytical reading and writing skills. Students will practice reading with care and will hold meaningful discussions about the texts they study. They will learn to produce well-organized, well-written, well-developed, and intellectually complex essays. They will perform the stages of writing from clarification of the assignment to final revision, working on grammar, composition, and editing.

Homework per class meeting: 3-6 hrs.
Recommended credit: 5 units
Tuition: $650  ($570 base tuition + $80 facilities fee)
COURSES

FINE ARTS

Fundamentals of Art
SD3811  Tu & Th  8:30 - 12:00  Annie Yi
This course is a comprehensive, in-depth study of the fundamentals of the arts. Students will develop observational and drawing skills through the use of a variety of media and subject matter. We will be covering a range of techniques adaptable to any student level, using various media including pencil, ink, charcoal, pastel, watercolors, paint, collage and printmaking. Students will explore their imagination and creativity through the investigation of themselves in self-reflections and use the basic concepts of art as knowledge to develop their ideas.

Students will create multiple projects that reflect the arts as a part of their lives, viewing art in perspectives and problem solving through expression to create art as a lifelong skill. This hands-on studio class involves group and individual instruction to encourage multiple ideas and creativity.

Grade Requirement: Open to all qualified SD students.

Homework per class meeting: 2-6 hrs.

Recommended credit: 5 units

Tuition: $700  ($570 base tuition + $130 facilities fee)

Architectural Design
SD3815  M W F  8:30 - 12:00  Cecelia Thornton-Alson
This course explores the built environment and introduces students to the architectural profession. The class focuses primarily on the formal principles of architectural design by examining examples from lectures and by visiting buildings on and off campus. Students will also develop an understanding of concepts in two-dimensional composition, landscape architecture, and urban planning. Students will express their ideas in scaled models and drawings.

The course consists of several week-long projects, including architectural drawings of existing buildings, abstract sculptural design, and designing new architectural structures. While working individually and in teams, students will be able to explore their creative potential and develop their ability to work effectively in groups. Knowing how to draw or build models is not a prerequisite.

Grade Requirement: For students completing Grade 8 and up.

Homework per class meeting: 3-6 hrs.

Recommended credit: 10 units

Tuition: $1000  ($850 base tuition + $150 facilities fee)

LANGUAGES

Introduction to French
SD3821  M W F  8:30 - 12:00  Jacob Raterman
NEW COURSE: This course will provide an introduction to French and Francophone cultures through speaking, listening, reading, and writing in French. It will be taught through language immersion and students will be speaking French from day one. Emphasis will be placed on developing student ability to create and to communicate with basic French structures and vocabulary. Linguistic and cultural mastery will be developed through oral exercises, individual and collaborative reports, class discussions, films, and music. This course is designed to cover the first semester of high school French.

Grade Requirement: Open to all qualified SD students.

Homework per class meeting: 2-5 hrs.

Recommended credit: 5 units

Tuition: $950  ($850 base tuition + $100 facilities fee)

First-Year Japanese
SD3823  M W F  8:30 - 12:00  Junko Hosoi
This course is based on a fun, playful, and effective approach to learning Japanese. This method is a synthesis of many innovative teaching techniques developed to help accelerate students’ language learning. The two major components of this course are: (1) acquisition of basic communication skills of elementary Japanese and (2) learning hiragana and katakana syllabaries as well as some kanji characters. The language is taught multi-modally: lots of physical movement, use of pictures and graphics, conversation practices, storytelling, and some story creating. Students also learn about modern Japanese life. This course is equivalent to one year of high school Japanese.

Grade Requirement: Open to all qualified SD students.

Homework per class meeting: 3-6 hrs.

Recommended credit: 10 units

Tuition: $950  ($850 base tuition + $100 facilities fee)

Advanced Placement Japanese Language & Culture
SD3828  M W F  1:00 - 4:30  Junko Hosoi
NEW COURSE: This course will build and develop strong language skills in three modes of communication: interpretive (reading, listening, and viewing), interpersonal (conversation and text chat), and presentational (oral presentation and written essay). Speaking activities will explore formal and casual speaking styles. Reading will focus on understanding of culturally relevant topics and further mastery and acquisition of new vocabulary and kanji through the process. As in preceding courses in the sequence, activities will revolve around lectures, discussions, presentations, and other performance based tasks. Students will also learn more about Japanese culture through films, games, and history. Class will be conducted mostly in Japanese. This course covers the full content of the high school AP curriculum.

Prerequisites: Completion of Third-Year Japanese with A- or above, or completion of Fourth-Year Japanese with B- or above, or permission of the Director.

Grade Requirement: Open to all qualified SD students.

Homework per class meeting: 4-8 hrs.

Recommended credit: 10 units

Tuition: $950  ($850 base tuition + $100 facilities fee)
Access outside of class to a desktop or laptop computer (i.e. not a tablet, Chromebook, or mobile device) and to the Internet is required to complete homework for all computer science courses. If possible, students are encouraged to bring their laptop to class so they can work on the same device at all times.

**Elements of Web Design**  
*The Internet Classroom*

**SD3833** M W F 8:30 - 12:00 Samuel Pierce

In this course, students will learn to combine computer code with graphic design to create their own websites. No programming experience is necessary; students begin with the concept of syntax and character encoding. They will become familiar with computer networks and file systems as they build standards-based web pages from the ground up using HTML and CSS. Students should be prepared to flex their creative muscles: coding topics will be balanced with a discussion of good visual design and layout, including digital graphics production and manipulation using Adobe Photoshop. They will also explore non-technical topics such as anonymity, intellectual property & copyright, journalism, social media, and yes: memes. This course provides the necessary foundation for students who want to continue on to contemporary web/mobile app development.

**Grade Requirement:** Open to all qualified SD students.

**Homework per class meeting:** 2-5 hrs.

**Recommended credit:** 10 units

**Tuition:** $1100  ($900 base tuition + $200 facilities fee)

---

**Introduction to Programming**  
*Solving Problems with Python*

**SD3834.1** Tu & Th 8:30 - 12:00 Tim Chevalier  
**SD3834.2** Tu & Th 1:00 - 4:30 Tim Chevalier  
**SD3834.4** M & Th 1:00 - 4:30 Aaron Brookner

Students in this class will learn how to solve puzzles with computer programming. No prior programming experience is necessary. Using the Python language, students will write programs collaboratively like experts in the field, working in pairs and critiquing each other’s programs. They will learn how to write programs that make decisions using conditional statements and interact with humans using loops and input/output. We will also talk and write about the ethical implications of technologies such as artificial intelligence and social media. Students will learn how to structure their thinking and write faster programs using the tools of algorithm and data structure design. At the end of this course, students will be able to put their logical thinking as well as their creativity to use to build relationships and tell stories with computers.

**Prerequisite:** None; completion of Algebra I is recommended.

**Grade Requirement:** Open to all qualified SD students.

**Homework per class meeting:** 3-6 hrs.

**Recommended credit:** 5 units

**Tuition:** $800  ($600 base tuition + $200 facilities fee)

---

**Programming in Java**

**SD3835.1** M W F 8:30 - 12:00 Anh Nguyen  
**SD3835.2** M W F 1:00 - 4:30 Anh Nguyen

This course will introduce students to object-oriented programming in Java. Programming experience is helpful but not necessary; students applying for this course must already feel comfortable with file systems, rules of syntax, and mathematical thinking, particularly the ideas of variables and functions. Students learn about object-oriented structures like classes very early in the course, along with basic Java syntax and graphics. Students will also learn how to process data structures like arrays and lists. Students will use searching and sorting algorithms to create powerful programs. Toward the end of the course, students will demonstrate their creative skills through various projects that explore advanced applications, such as artificial intelligence or graphic user interfaces.

**Prerequisite:** Completion of Algebra I required. Completion of an introductory computer science course recommended.

**Grade Requirement:** Open to all qualified SD students.

**Homework per class meeting:** 3-7 hrs.

**Recommended credit:** 10 units

**Tuition:** $1100  ($900 base tuition + $200 facilities fee)

---

**Web Development**  
*The Advanced Internet Classroom*

**SD3837** Tu & Th 8:30 - 12:00 S McDonald & S Pierce

Want to build your own online store, mobile-friendly chatroom, or even your own Facebook? This course will teach students how to build complex, dynamic websites using PHP and jQuery. This course expands on the concepts in Elements of Web Design and computer programming classes. Students will become familiar with several new languages and the basics of database design. Particular attention will be paid to the reading and comprehension of programming APIs, allowing students to continue to grow as independent computer scientists.

**Prerequisite:** Completion of Elements of Web Design and a programming class (such as Programming in Java), or a passing score on a placement test, or permission of the Director.

**Grade Requirement:** Open to all qualified SD students.

**Homework per class meeting:** 2-4 hrs.

**Recommended credit:** 5 units

**Tuition:** $800  ($600 base tuition + $200 facilities fee)

---

Interested in computer graphics?  
Take your geometry knowledge to the next step in Visual Computing on p. 8.
**Foundations of Algebra**
SD3840  Tu & Th  1:00 - 4:30  Claudia Benedetti

This course is designed to strengthen and develop skills that are essential for students who will be entering an Algebra I course in the fall. We will study strategies for problem solving, patterns and functions, probability, graphing, equations, properties, exponents and geometric thinking. During the six-week course, we will identify individual student curricular needs and then design instruction to challenge all students in the class. Students will approach problem-solving using a scientific approach: defining the problem, making predictions and hypotheses, testing assertions, using algebra to generalize from specifics, making conclusions and supporting them with logical argument and proof. Working with the Common Core Curriculum, proofs will entail writing the process of the solution in complete form, thus demonstrating students’ mastery of the curriculum. This class is for students who have not taken Algebra I.

**Grade Requirement:** For students completing Grade 7 or 8.

**Homework per class meeting:** 2-5 hrs.

**Recommended credit:** 5 units

**Tuition:** $650  ($570 base tuition + $80 facilities fee)

**Algebra I**
SD3841  M W F  8:30 - 12:00  Milly Farid

This six-week course covers a full year of Algebra I and is aligned with Common Core standards for high school Algebra classes. Topics to be covered include patterns and graphs; writing and solving equations; numeric, geometric, and algebraic ratios; slopes and rates of change; linear functions and graphing; factoring quadratics and other polynomials; systems of linear equations and inequalities; radicals and exponents; rational and irrational numbers; and graphing quadratic functions and finding roots. Students frequently spend eight hours outside of class preparing for each class session. The atmosphere of the class is cooperative; the emphasis is on working together.

**Prerequisite:** Completion of Pre-Algebra, grade of A in current math class, Teacher Review Form completed by current math instructor, and passing score on placement test.

**Homework per class meeting:** 3-6 hrs.

**Recommended credit:** 10 units

**Tuition:** $1000  ($850 base tuition + $150 facilities fee)

**Geometry**
SD3843.1  M W F  8:30 - 12:00  Philippe Henri
SD3843.2  M W F  1:00 - 4:30  Philippe Henri

This fast-paced course completes all topics of first-year Geometry; points, lines, planes, and angles; deductive reasoning; parallel lines and planes; congruent triangles; quadrilaterals; inequalities in geometry; similar polygons; right triangles; circles; constructions and loci; areas of plane figures; areas and volumes of solids; coordinate geometry; transformations; and an introduction to trigonometry. Because the course covers a full year of Geometry, students spend at least eight hours outside of class preparing for each class session.

**Prerequisite:** Completion of Algebra I, grade of A in current math class, Teacher Review Form completed by current math instructor, and passing score on placement test.

**Homework per class meeting:** 6-10 hrs.

**Recommended credit:** 10 units

**Tuition:** $1000  ($850 base tuition + $150 facilities fee)

**Visual Computing**
With Mathematical Constructions
SD3844  Tu & Th  1:00 - 4:30  Toby Jaw

**NEW COURSE:** How do you design a world of visual complexity starting with a simple set of rules? With math, of course! This course explores the relationship between technology, geometry, algebra, and art. We will explore the basic principles of dynamic geometry that are used in visual art, computer graphics, and more. Starting hands-on with the fundamental geometric constructions using a compass and straightedge, students will then expand on these concepts to create their own designs both by hand and by using The Geometry’s Sketchpad® software to create geometry-based artwork such as spirals, fractals, perspective drawings, and even animations. Students will review and apply many algebraic solving techniques, as well as geometry principles, in order to make deeper connections with the constructions they create, and to reinforce skills that are necessary for success in Algebra 2 or Integrated Math 3. Students will also focus on articulating math concepts precisely, an important practice that is greatly emphasized by the Common Core.

**Prerequisite:** Completion of Geometry or Integrated Math II.

**Homework per class meeting:** 2-5 hrs.

**Recommended credit:** 5 units

**Tuition:** $650  ($570 base tuition + $80 facilities fee)

---

**Applying for an accelerated math course**

If you are interested in taking an accelerated mathematics course (i.e., Algebra I, Geometry, Algebra II/Trigonometry, marked with the symbol), please note the following admissions requirements:

- You must have a grade of A in your current mathematics class, and a strong academic profile overall;
- You cannot repeat a math course you have already taken;
- Your Teacher Review Form must be completed by your current mathematics teacher, and;
- You must take and pass the diagnostic examination given on the afternoon of Saturday, May 19, 2018.

As noted above, acceptance and placement into all accelerated mathematics courses is contingent upon successful passing of a written diagnostic test. If you are unable to take the test on May 19, the acceptance letter will provide instructions on scheduling a date for a makeup test. Results will be mailed and posted online the week after testing.

Students who do not pass their placement test remain admitted to the program. We will work with these students to find a more suitable course placement. Please note that these additional admissions requirements pertain to students applying for accelerated mathematics courses only; they do not pertain to 5-unit math courses. Students in Foundations of Algebra do need to take the diagnostic test on May 19, but their score will have no effect on their final placement.

The diagnostic test is for placement purposes only. Families may be informed of a total percentage score as it relates to placement criteria, but detailed results will not be available.
Algebra II/Trigonometry

SD3846  M W F  1:00 - 4:30  Toby Jaw

This extremely fast-paced course completes all topics of second-year Algebra with trigonometry: linear functions and relations; systems of linear equations and inequalities; quadratic functions and complex numbers; exponential and logarithmic functions; rational and irrational algebraic functions; quadratic relations and systems; higher degree functions and polynomials; sequences and series; graphing techniques; circular and trigonometric functions; and use of mathematical models for applications and problem solving. Because the course covers a full year of material, students spend a great deal of time outside class preparing for each class session.

Prerequisite: Completion of Geometry, grade of A in current math class, Teacher Review Form completed by current math instructor, and passing score on placement test.

Homework per class meeting: 5-8 hrs.
Recommended credit: 10 units
Tuition: $1000  ($850 base tuition + $150 facilities fee)

Applied Mathematics
Understanding Higher Math through Physics and Tinkering

SD3847  M W F  8:30 - 12:00  Kaushik Basu

NOTE: This course has a four-week schedule. It starts July 2 and ends July 27.

Have you wondered how much gas you would save if the highway speed limit were dropped to 55 miles per hour? Would you imagine that dropping coffee filters may have some bearing to that question? This course will explore mathematical descriptions of objects in the real world through hands on projects. Students will build interesting toys to ‘prove’ mathematical theorems. We will learn to use approximations effectively, and discover how these ideas lead to the study of calculus in a natural way. We will also be learning trigonometry and vectors, as well as a technique called dimensional analysis, which blends physics into algebra. We will be testing our mathematical results along the way by considering their physical meaning in extreme, and hopefully absurd, situations. In the process, we will get a sense of how numbers are used in science, as well as how physics can inspire new mathematical ideas.

Prerequisite: Completion of Algebra II or Integrated Math III.

Homework per class meeting: 2-4 hrs.
Recommended credit: 5 units
Tuition: $650  ($570 base tuition + $80 facilities fee)

Advanced Placement Statistics

SD3848  M W F  1:00 - 4:30  Staff

Statistics is perhaps the most widely applicable branch of mathematics, and coursework will often use real-world data. The class is equivalent to a one-semester, introductory, non-calculus-based college course in statistics and will prepare students for the AP Statistics examination in May 2019. Guided by the AP Statistics syllabus, this course will introduce students to the major concepts and tools for collecting, analyzing, and drawing conclusions from data. There will be four themes: exploring data, sampling and experimentation, anticipating patterns, and statistical inference. Students will use technology, investigations, problem solving, and writing as they build conceptual understanding and become fluent with the language and formulas of statistics. In class, students will use graphing calculators that have extensive statistical capabilities, and students will be expected to bring a graphing calculator with statistical capabilities to the AP exam.

Prerequisite: Completion of Algebra II or Integrated Math III, grade of A in current math class, and Teacher Review Form completed by current math instructor.

Grade Requirement: For students completing Grade 9 and up, completion of 10th grade recommended.

Homework per class meeting: 4-8 hrs.
Recommended credit: 10 units
Tuition: $1000  ($850 base tuition + $150 facilities fee)

Public Speaking

SD3850.1  Tu & F  8:30 - 12:00  Elizabeth Scherman
SD3850.2  Tu & F  1:00 - 4:30  Laura Shefler
SD3850.4  M & Th  1:00 - 4:30  Laura Shefler

Students in this course will develop the writing and performance skills needed to become clear, compelling, confident, and persuasive public speakers. We will practice a variety of speaking styles, including impromptu (speaking “off the cuff” on a randomly selected topic), dramatic interpretation (of monologues from novels, plays, and films), debate (defending a position on a controversial issue), and oratory (a formal speech that seeks to inform, inspire, or persuade on a topic of your choice). We will also study, view, and analyze the performances of some of the most powerful orators of the past century. If you are seeking to reduce your anxiety about public speaking, this course provides a friendly, nonthreatening environment in which to increase your confidence. If you already enjoy public speaking, you will have an opportunity to enhance and practice your skills.

Tu & F Sections (SD3850.1 & 50.2): For students completing Grades 6, 7, or 8 only.
M & Th Section (SD3850.4): For students completing Grades 9, 10, or 11 only.

Homework per class meeting: 2-4 hrs.
Recommended credit: 5 units
Tuition: $650  ($570 base tuition + $80 facilities fee)
Social Psychology
SD3852  Tu & Th  1:00 - 4:30  Cyrell Roberson

Social psychology is the scientific study of the way people think about, feel, and behave in social situations. It involves understanding how people influence, and are influenced by, others around them. A primary goal of this course is to introduce you to the perspectives, research methods, and empirical findings of social psychology. We will use a college-level textbook along with supplementary readings to cover topics including: impression formation, conformity, pro-social behavior, interpersonal attraction, persuasion, stereotyping and prejudice. Equally important is the goal of cultivating your skills for analyzing the social situations and events that you encounter in your everyday lives. Finally, throughout the course, emphasis will be placed on developing critical and integrative ways of thinking about theory and research in social psychology.

Grade Requirement: For students completing Grade 8 and up.

Homework per class meeting: 2-5 hrs.
Recommended credit: 5 units
Tuition: $650 ($570 base tuition + $80 facilities fee)

The Practice of Law
SD3858.1  M & Th  8:30 - 12:00  Gary Kitajo
SD3858.2  M & Th  1:00 - 4:30  Gary Kitajo

This course will provide an overview of social institutions and functions addressed in the practice of law. Students will participate in each of the lawyer's roles: investigation, research, advocacy, trial preparation, and dispute resolution. In the process, students will examine the nature and history of law, interrogate parties, argue hypothetical cases, and draft legal pleadings and documents. This class requires active participation in lively classroom activities and projects, which include simulated trials, oral argument, and case briefing. Students are encouraged to participate freely in robust classroom discussions and debates, with a premium placed on the open exchange of ideas and opinions. The course will culminate in a mock trial, conducted in a courtroom setting before a presiding judge.

Grade Requirement: For students completing Grade 8 and up.

Homework per class meeting: 2-4 hrs.
Recommended credit: 5 units
Tuition: $650 ($570 base tuition + $80 facilities fee)

Philosophy & Critical Thinking
SD3860  Tu & F  1:00 - 4:30  Alexander James

NEW COURSE: This course is an introduction to the interrelated fields of philosophy and critical thinking. Philosophy is the exploration of the fundamental questions of existence and reality, aiming to reconcile our understanding of things from various domains. Philosophers seek to address philosophical problems, such as the problem of free will or the problem of consciousness, and construct philosophical systems that enable us meaningfully to organize our knowledge. Critical thinking is the activity of taking a critical look at our beliefs, and at the method by which we form and justify these beliefs and convey them—in writing, speech and debate—within a community of knowers and inquirers. Critical thinking offers guidance in logic and reasoning, and helps us gain awareness of the ways in which we can be led astray in the search for truth. The study of philosophy and critical thinking provides students with the resources and experience to become deeper and clearer thinkers and more capable writers, learners and researchers.

Grade Requirement: For students completing Grade 8 and up.

Homework per class meeting: 2-4 hrs.
Recommended credit: 5 units
Tuition: $650 ($570 base tuition + $80 facilities fee)

Advanced Placement Psychology
SD3861  M & W  8:30 - 12:00  Dante Dixson

This course provides a rigorous introduction to the fundamental concepts in psychology and prepares students for the May 2019 AP examination in psychology. Topics include the neurological processes that lead to thought and behavior, the processes that allow people to sense and perceive information from the environment, sleep and dreams, behavior, sources of the motivation to act, emotional experiences, language, memory, human development across the lifespan, personality, psychological disorders, friendship, altruism, bias and discrimination, research methods, and statistics. The course uses a college textbook and requires that students do a significant amount of independent reading. Students come to class prepared to engage in interactive work, such as the analysis of case studies and current or historical events. Students also design and carry out an independent research project. In order to fully prepare students for the AP examination, students get ample practice answering AP-style questions.

Grade Requirement: For students completing Grade 9 and up, completion of 10th grade recommended.

Homework per class meeting: 3-7 hrs.
Recommended credit: 10 units
Tuition: $950 ($850 base tuition + $100 facilities fee)

Feeling quantitative? Learn the math behind the social sciences in AP Statistics on p. 9.
Introduction to Biotechnology
SD3871.1  Tu & Th  8:30 - 12:00  Debbie Clark
SD3871.2  Tu & Th  1:00 - 4:30  Debbie Clark

In this course, students will be introduced to the principles and techniques of molecular biology that are used to study and manipulate DNA in basic research, medicine, forensics, and agriculture. We will begin by studying the structure and chemistry of DNA, and we will then learn about many of the laboratory techniques used in recombinant DNA technology, including restriction digests, PCR, bacterial transformation, and immunological assays. In each class meeting, students will conduct hands-on experiments and learn about the real-world uses and implications of biotechnology. Additionally, students will complete weekly current events reports and examine the ethical considerations raised by advances in the field.

Grade Requirement: For students completing Grade 7 or 8.

Homework per class meeting: 3-6 hrs.
Recommended credit: 5 units
Tuition: $800  ($580 base tuition + $220 facilities fee)

Introduction to Chemistry
SD3873.1  Tu & F  8:30 - 12:00  Staff
SD3873.2  Tu & F  1:00 - 4:30  Staff

Throughout this course, laboratory activities and discussions will focus on how chemists describe matter and its changes within the context of alchemy and early chemistry. Understanding the periodic table, the particulate nature of matter, ionic compounds, and solution chemistry will provide the basis for students to think about the world in terms of particles and their interactions. This course provides a grounding in scientific principles, which will prepare students to continue on to a high school chemistry class.

Grade Requirement: For students completing Grade 8 and up.

Homework per class meeting: 3-5 hrs.
Recommended credit: 5 units
Tuition: $800  ($580 base tuition + $220 facilities fee)

Introduction to Engineering
SD3872  Tu & Th  1:00 - 4:30  Staff

The course is designed to give students an overview of diverse engineering disciplines—mechanical, electrical, and civil—in order to find out what engineers actually do. Students will see the difference between “science” as the discovery of new knowledge and “engineering” as the uses of that knowledge in new environments. Students will practice their own engineering skills, finding out how things work in the real world through various projects and hands-on activities. The course will emphasize creative and analytical problem solving, hands-on building activities, design, and teamwork.

Grade Requirement: For students completing Grade 7 or 8.

Homework per class meeting: 2-4 hrs.
Recommended credit: 5 units
Tuition: $800  ($580 base tuition + $220 facilities fee)

Introduction to Astronomy & Astrophysics
SD3874  M W F  1:00 - 4:30  Lorraine Cook

NOTE: This course has a four-week schedule. It starts June 18 and ends July 13.

In this course, students will learn about many of the objects that make up our solar system and surrounding galaxy, as well as some of the physics responsible for the appearance, behavior, and interactions of these objects. Students will gain a quantitive understanding of the movement of celestial objects through the sky and how astronomical tools such as telescopes, astronomical cameras, spectroscopy, space probes and orbital observatories help gather data to support claims. Topics include interactions of the Earth, Sun, & Moon; Kepler’s Laws and bodies of the solar system; types of stars; nebulae and stellar evolution; discovery of extrasolar planets; galactic structure; and relevant cosmology. Students will utilize authentic astronomical data and interpretation tools using current statistical techniques to establish the identity of objects in our Local Group. This course may include multiple observations of the sun, a late-night sky observation or field trip, and an interview with a practicing astrophysicist.

Prerequisite: Completion of Geometry or Integrated Math II.

Grade Requirement: For students completing Grade 9 and up.

Homework per class meeting: 2-6 hrs.
Recommended credit: 5 units
Tuition: $800  ($580 base tuition + $220 facilities fee)
Advanced Biotechnology

SD3875.1 M W F 8:30 - 12:00 Jay Chugh
SD3875.2 M W F 1:00 - 4:30 Jay Chugh

NOTE: This course has a four-week schedule. It starts June 18 and ends July 13.

In this course, students will conduct advanced biotechnology experiments, including DNA extraction, PCR, bacterial transformation, and protein gel electrophoresis. Students will also research and design their own inquiry-driven experiments, which they can then continue during the school year in preparation for the science fair. Additionally, we will explore ethical and political implications of biotechnology; topics include genetically modified organisms, cloning, reproductive biotechnology, and stem cell research.

Prerequisite: Completion of high school Biology. Background in Chemistry recommended.

Grade Requirement: For students completing Grade 9 and up.

Homework per class meeting: 4-8 hrs.

Recommended credit: 5 units

Tuition: $800 ($580 base tuition + $220 facilities fee)

Advanced Placement Environmental Science

SD3877 Tu & Th 9:00 - 3:30 Gene Vann

In this course, students will build on their knowledge of natural and physical sciences while rigorously preparing for the AP Environmental Science exam. The course will cover a broad range of topics including ecosystem ecology, energy resources and consumption, population growth, land and water use, waste and pollution, and global change. Students will use their growing understanding of scientific principles and reasoning to explore, analyze, and propose solutions to a series of current environmental problems, both natural and human-made. Inquiry-based labs and occasional field trips will allow students to apply course concepts to real world scenarios. The AP Environmental Science course is designed to be the equivalent of a one-semester, introductory college course in environmental science.

Prerequisite: Completion of Algebra I, high school Biology, and high school Chemistry. A course in earth science is helpful but not required.

Grade Requirement: For students completing Grade 9 and up.

Homework per class meeting: 4-8 hrs.

Recommended credit: 10 units

Tuition: $1070 ($850 base tuition + $220 facilities fee)

Advanced Placement Biology

SD3879 M W F 8:30 - 4:30 Greg Martinez

This course provides an opportunity for students to accelerate their study of biology with an introductory college-level biology course and to prepare for the May 2019 AP examination in Biology. The course uses a college-level textbook and follows the College Board course outline. Laboratory work is extensive and will be included in each class session. Topics include Molecular and Cellular Biology (biochemistry, cells, energy transformations), Genetics and Evolution (genetics, molecular genetics, evolution), Population Biology (plant biology and animal biology, including that of humans), and Ecology.

Prerequisite: Completion of Algebra I, high school Biology, and high school Chemistry.

Grade Requirement: For students completing Grade 9 and up; completion of 10th Grade recommended.

Homework per class meeting: 4-8 hrs.

Recommended credit: 10 units

Tuition: $1500 ($1280 base tuition + $220 facilities fee)

Cognitive Neuroscience

SD3882 M & W 1:00 - 4:30 Paul Bulakowski

Cognitive neuroscientists aim to answer one of the last remaining fundamental questions of science: how does a three-pound lump of organic material—the brain—support such a wide array of functions, such as perception, thinking and reasoning, emotion, movement, and consciousness? Through active college-style lectures, demonstrations, and hands-on activities, we will explore modern theories and applications of adult and developmental neuroscience, along with the research methodologies used (e.g., single unit recording, fMRI, EEG, psychophysics). We will use diverse college-level reading materials to introduce key topic areas of Cognitive Neuroscience, including cells and systems, sensation and perception, attention, learning and memory, emotion, and development. An end-of-year project will provide the opportunity to learn how to read and evaluate primary research articles directly from the scientists in the field and propose an experiment on a brain topic of special interest.

Prerequisite: Completion of high school Chemistry, or high school Biology, or AP Psychology.

Grade Requirement: For students completing Grade 9 and up.

Homework per class meeting: 6-10 hrs.

Recommended credit: 5 units

Tuition: $650 ($570 base tuition + $80 facilities fee)

Curious about the mind?

Learn more about human behavior in our psychology classes on p. 10.
ATTENDING

Secondary Division students can expect an intense and unforgettable experience at one of the world’s most eminent public college campuses. Whether traveling from your neighborhood BART station or arriving from out-of-state, ATDP students should prepare for a stimulating preview of the rigors of university study.

Acceptance

PLACEMENT MAILING

Students who have been accepted to ATDP and who applied by the early or standard postmark deadlines will be mailed an acceptance packet on March 29. This packet contains a welcome letter with important information, your course placement, tuition payment instructions, our Explorations guide (see “Explorations,” p. 2), a campus map, and the Notification of Attendance or Withdrawal form.

CONFIRMING PLACEMENT

To confirm course placement, students who plan to attend must return the Notification of Attendance or Withdrawal, in addition to their emergency information and tuition payment, by the appropriate tuition deadline (according to their application date). See p. 17 for deadline dates.

Providing immunization records. University of California policy requires all students participating in campus programs to provide proof of immunization. Families of students who are admitted to the program should be prepared to provide immunization information for each student when they confirm their course placement. Returning families who submitted immunization records previously will not need to submit them again so long as the records are accurate and on file.

OTHER PLACEMENT DECISIONS

In certain situations, students may be accepted to the program without a course placement:

In a wait pool. Very popular courses fill quickly. If your first course choice becomes unavailable, we will automatically place you into a pool of applicants to be considered if a spot opens. Unlike a traditional waiting list, all applicants are considered for openings, and we use the same criteria as in our normal application process. Applicants may join wait pools regardless of their placement status.

Need alternate course choices. Many factors determine whether an applicant qualifies for a particular course, including prerequisites, grade level, and strength of the academic profile relative to other applicants. If an accepted student does not qualify for the particular course(s) indicated on the application, we will ask for alternates. We are happy to work with applicants to find the best course placement.

ATDP isn’t for everyone! We encourage students who cannot commit to attending ATDP or who have not been accepted to explore other summer opportunities at UC Berkeley or elsewhere. These students are welcome to apply again for summer 2019.
**TUITION**

Tuition fees for ATDP courses can be found under the individual course descriptions (pp. 5-12). These include the base tuition fee and facilities fee, but do not include the application processing fee, nor expenses for textbooks, personal supplies, or transportation. Families will be notified of their balance due when placement decisions are made available. For those making a single payment, families will have until their tuition deadline to send a check for the entire balance. If a family needs to pay in installments, the first payment of at least $100 must be postmarked by April 30 and the remaining balance must be fully paid by Friday, July 27 (the last day of classes).

See p. 17 for tuition deadlines.

**APPLICATION PROCESSING FEE**

The $50 non-refundable processing fee is separate from tuition and is payable by check only. Checks should be made out to “UC Regents” and mailed to the ATDP office with each completed application. Write the student’s first and last name and “SD” on the check’s memo line.

**SIBLING DISCOUNT**

For families sending two or more siblings to the program, a $35 tuition discount is available for each student. For example, if two siblings attended, each student would receive one $35 discount from tuition, for a total family discount of $70. This discount is taken from course tuition only, not from the $50 application processing fee or the facilities fee.

**FINANCIAL AID**

ATDP is a self-supporting program funded by student fees. However, limited need-based financial aid is available to qualified applicants. We are unable to provide financial aid to international students, those coming from outside of the immediate San Francisco Bay Area, or 11th graders who are new to the program.

Requests for financial aid—complete with supporting documents, tax returns, and schedules—are due by the standard application deadline of Wednesday, February 28, 2018. We do not consider applications for financial aid after this deadline. If payment of the non-refundable $50 processing fee poses a financial hardship, attach a signed note of explanation with the tax returns in lieu of the payment.

All admission and placement decisions are made independently of financial aid status. Your application will not be held up pending a financial aid decision. However, we can only evaluate your request for financial aid once we receive all required documents. Financial aid decisions are based on total resources, not only on household income.

Applicants who are accepted will be mailed notification of the amount of financial aid on March 29. Awards cover base tuition only; they do not cover transportation, textbooks, course facilities fees or other expenses. Families who need to pay tuition in installments will have until July 27 to do so. Details will be included in the acceptance letter.

Instructions for applying for financial aid are on page 39.

**REFUND POLICY**

A parent whose registered student is unable to attend must withdraw the student in writing and may request a tuition refund. Prior to Wednesday, May 16, 2018, tuition and facilities fee payments are refundable. After May 17, refunds are subject to the ATDP Refund Schedule, which will be included in the student’s acceptance packet.

No refund will be made in the case of a student who fails to attend classes or is withdrawn from ATDP for failure to meet the standards of appropriate behavior, including completion of homework. The $50 processing fee is also nonrefundable.

---

**Location & Transportation**

All SD courses are held on the UC Berkeley campus, which is conveniently located a short walk away from the Downtown Berkeley BART station and several AC Transit bus lines. Many families choose to carpool to campus, and information about carpools, BART meet-ups, and campus shuttles will be provided in the student’s acceptance packet. For families driving to Berkeley, please visit UC Berkeley’s Parking and Transportation website (tp.berkeley.edu) for parking details.

**THE ATDP MAIN OFFICE**

Though the Graduate School of Education is moving in spring 2018, ATDP’s main office will remain in the same location. Please look us up at 2199 Addison Street in Berkeley to find University Hall. We are in room 70 on the ground floor.

**COMMUTER DIRECTORY**

For students interested in travelling together, ATDP provides an online directory of other students from their area who are also interested in commuting. Families then contact each other and form their own carpool or BART groups. The commuter directory is available only to students who have been accepted into the program, who have an online account, and who have opted into the directory themselves.

If you and a sibling or friend want to attend ATDP at the same time so that you can commute together, include the request in the Letter of Interest in both applications. Make certain that the schedules of the courses you each request match. The earlier you both apply, the more likely we will be able to work with your schedules.

**BART**

Since Berkeley parking is extremely difficult, many visitors arrive to the Downtown Berkeley BART station, which is a 3-minute walk from the edge of campus.

**Student tickets.** For Secondary Division students who prefer the convenience of BART to travel to and from campus, BART authorizes middle and high schools to resell discounted Orange tickets at half the price of a standard ticket. Because ATDP is not a middle or high school, we cannot sell these tickets. However, if a student is able to purchase these tickets at his or her own school, they may be used for transit to and from ATDP during the summer. BART Orange tickets do not expire and, if unused, may be returned to BART for a cash refund.
Orientation & Preparation

WELCOME & ORIENTATION

The Secondary Division orientation will be held for students and families on Sunday, June 3. This is a good time for accepted students to become familiar with the Berkeley campus, meet their instructor and their new classmates, ask questions of the ATDP staff, and find their classroom location.

TEACHER LETTER & FIRST ASSIGNMENT

At the end of the orientation program, Secondary Division instructors will hand out an important letter to students that includes contact and course information. **Most instructors will assign coursework to be completed prior to the first class meeting.** This letter will be mailed home to students who do not attend the orientation.

TEXTBOOKS

Most course textbooks will be available for purchase at University Press Books, starting from Orientation on June 3 until your first day of class. Some instructors will prepare a course-specific reader purchasable at Bancroft Copy Central. Please note that textbooks and students’ supplies are not included in tuition.

Attendance

POLICY

There are no excused absences at ATDP. As expectations are high and courses are fast-paced, even one absence makes it difficult to keep pace. Therefore, students are expected to attend every class session. **Missing too much class time for any reason may result in dismissal from the program without refund.** Even in the case of unanticipated circumstances, there are some things that cannot be “made up” (such as introductions, class participation, group activities, presentations, or examinations, for example).

All matters affecting regular attendance—absence, coming late, or leaving early—must be communicated in writing to the program office (not the instructor) by a parent or guardian (not the student). If there are special circumstances that will affect a student’s ability to **attend every class**, please contact the program office in writing before applying. Barring exceptional circumstances, students who anticipate missing too much class time will not be allowed to attend the program. Anticipated absences not addressed prior to the May 16 refund deadline will not be accommodated. A student’s attendance record will be taken into account in admission decisions in subsequent years.

Students who miss class time may not be eligible for a recommendation of credit and may not receive a final evaluation. Attendance decisions are not related to whether the student is taking the class for a possible recommendation of credit. Attending every class does not guarantee that a student will be recommended credit.

INDEPENDENCE DAY HOLIDAY

The UC Berkeley campus will be closed on Wednesday, July 4, 2018, in observance of Independence Day. Any course which is normally held on a Wednesday will have a make-up class session. Make-up classes will be determined and announced per class by the course instructor; most are rescheduled for the week of July 4.

Final Evaluation

Upon completing a Secondary Division course, ATDP students will receive a final evaluation from their instructor. Printed on official UC bond paper, this document can be sent to schools as proof of course completion. It includes the instructor’s narrative evaluation of student performance, final letter grade, and whether the student has earned a recommendation of credit. ATDP will send one copy home in August and, if authorized by you, one copy to a selected school at no charge.

ATDP cannot provide a transcript for any of its courses, and the final evaluation is not an acceptable substitute for a high school transcript. For more information about ATDP’s recommendation of credit, see “Credit” on page 2.

Attending FAQ

**My sibling/friend and I need to have class at the same time. What can I do to ensure that we can commute together?**

Attach notes to both of your applications indicating that you need to travel together and make certain that your courses’ times match. The earlier you both apply, the more likely it is that we will be able to work with your schedules.

**Where can I find summer housing near UC Berkeley?**

ATDP is not a residential program. Unfortunately, we are unable to assist families with housing arrangements.

**Where can I find summer housing near UC Berkeley?**

ATDP is not a residential program. Unfortunately, we are unable to assist families with housing arrangements.
THE APPLICATION PROCESS

We make every effort to place all qualified students in their first-choice course. ATDP makes placement decisions on a continuous basis, beginning as soon as applications are completed. However, course enrollment is limited, and there are often more qualified applicants than the program can accommodate. It is generally advantageous to apply early, preferably well before the postmark deadlines. The application process is the same for new and returning students. Students must reapply every year, and returning students are not guaranteed automatic readmission or placement in their first choice of course. Incomplete applications are not considered for placement.

NEW VS RETURNING

A student who applied in a previous year and then withdrew without completing a course will be considered a new student for admission purposes. Students who have attended the Elementary Division previously are also considered new students.

ACCEPTANCE DECISIONS

On March 29, 2018, ATDP will mail a letter to applicants who applied by February 28 informing them whether they have been accepted. Acceptance packets will include your course placement, balance due, and forms required for attendance.

See the table on p. 17 for more details.

ATDP has a more thorough application process than many other programs because it’s crucial for us to have as well-rounded an academic profile of the applicant as possible. This allows students to show their strengths in different ways, and it ensures they are prepared for the rigors of a fast-paced Secondary Division course. It also gives them practice for the college application process!

NEW THIS YEAR: EARLY AND EXTENDED APPLICATION

This year, ATDP is expanding its Secondary Division application deadlines.

**Early Application.** A limited number of spots in each course will be reserved for early applicants. Early applicants must fill out the application form using an online account at atdp.berkeley.edu, and they may receive early acceptance decisions there.

As in previous years, returning SD students will receive priority if they apply early. Based on the number and relative strength of other early applications, an early applicant may be automatically converted to a standard applicant if no early acceptance decision is possible.

**Extended Application.** For courses that still have open spots after the standard application period, we will accept applications through May on a rolling basis. Note that financial aid will no longer be available for applications completed after February 28.
Deadlines & Notification

ATDP evaluates applications continuously, in the order they are completed. The earlier you apply, the better your chances at receiving placement into your preferred course!

**EARLY APPLICATION**
- Financial aid available
- Must submit form online
- Returning SD students receive priority

**STANDARD APPLICATION**
- Financial aid available

**EXTENDED APPLICATION**
- Financial aid **NOT** available
- Limited course availability
- Rolling acceptance decisions

- Application Postmark Deadline: **Wednesday, February 14**
- Application Postmark Deadline: **Wednesday, February 28**
- Final Postmark Deadline: **Wednesday, May 30**

- Acceptance Decisions: **Wednesday, March 14 (online*)**
- Acceptance Decisions: **Thursday, March 29**
- Acceptance Decisions: within three weeks of receipt of the completed application

- Tuition Deadline: **Monday, April 16**
- Tuition Deadline: **Monday, April 30**
- Tuition Deadline: within two weeks of receipt of the acceptance decision

* Early applicants may be able to access acceptance information early online, but they will still receive a mailed packet at a later date.

Subscribe to our community newsletter at [atdp.berkeley.edu/news](http://atdp.berkeley.edu/news) or follow us on Facebook at [facebook.com/ucb.atdp](https://facebook.com/ucb.atdp) to receive notification as soon as these dates are available!

Application Checklist

Use the checklist below to ensure you are submitting a complete application. Step-by-step application instructions begin on the following page.

Make sure you have included all required documents in the order below! Applications missing required items will **NOT** be considered.

- Processing fee ($50 check, payable to “UC Regents”) on top of other documents
  - OR
  - Signed note of explanation if this poses a financial hardship
- Statement of Commitment printed and signed, if applying online
  - OR
  - Paper Application Information Form with signed Statement of Commitment, if not applying online
- Letter of Interest
- Envelope containing your Teacher Review Form, with teacher’s signature over the sealed flap
- Photocopy of most recent report card
- Photocopy of achievement test scores or signed, stamped note from school administrative staff indicating none are available
- Academic product or essay
- Photocopy of College Board PSAT and/or SAT scores, if available (optional)
- Federal tax return and all schedules, if applying for need-based financial aid (optional)

CONTINUED ON NEXT PAGE

CONTINUED ON NEXT PAGE
Application Instructions (in 4 steps)

STEP 1: Choose a course

Browse our course offerings listed on pp. 5-12. Choose one course that interests you and up to three alternates. Make note of the listed course number and any grade requirements or prerequisites. Keep our attendance policy (p. 15) in mind as you review the course schedule.

See “Selecting a Course” on page 3.

Course availability may change throughout the application season as courses fill. Check atdp.berkeley.edu/sd/catalog for updates.

STEP 2: Gather documents

Please compile the following items in the order listed below. Items numbered 1 through 5 are required for a complete application. We request you include College Board PSAT/SAT scores (item 6) if they are available, and federal tax documentation (item 7) if you wish to apply for financial aid.

1. Letter of Interest

Please write a cover letter to accompany your application, 200 word minimum, explaining your reasons for choosing each of the courses listed on your Application Information Form. In your (the student’s) own words, include information about your interest in the subject(s), what you hope to learn, and related experience, if any. If the course(s) you list have prerequisites, mention how you have met them. In this letter and on your Application Information Form, only list courses in which you are actually interested in enrolling. Please do not send certificates or awards.

Your letter may also include any special circumstances, such as transportation or scheduling needs.

If you are applying for two courses, include your petition in your letter. Specify your desired course schedule, and explain your plan for managing the increased time commitment. See “Applying for Two Courses” on page 4.

2. Teacher Review Form

Give the Teacher Review Form—attached between pages 10 and 11—along with an envelope to a current teacher in any academic subject (e.g., mathematics, science, language arts; not elective, advisory, or extracurricular classes). Your teacher should complete the form, seal it in the envelope, sign his or her name across the sealed flap, and then return the envelope to you.

The teacher’s academic subject need not match the subject of the ATDP course(s) to which you are applying, with one exception. If you are applying for Algebra I, Geometry, or Algebra II/Trigonometry, this form must be completed by your current math teacher, in addition to the accelerated mathematics prerequisites listed on page 8.

Remember that your teacher’s time is valuable. We recommend giving your teacher this form at least one week before you plan to submit it with your application.

Do not request a separate letter of recommendation. Do not submit more than one Teacher Review Form with your application materials.

A fillable PDF version of the form can be downloaded from atdp.berkeley.edu/resources.

3. Copy of Report Card

Submit a legible photocopy of your first semester (or most recent) report card for the current (“17–`18) school year.

We request that you send final grades, but if those are not available, you may submit your most recent progress report. Do not delay submitting your application to wait for final grades; if necessary, we may ask for an updated report card after receiving your application. If you need assistance obtaining a copy, ask in your school office.

4. Copy of Test Scores

Include a legible photocopy of your most recent California standardized test (CAASPP) or other standardized achievement test scores (e.g., Stanford Achievement Test, Iowa Test of Basic Skills, or other school-administered test that gives national percentile scores). The test must have been taken within the past three years (i.e., 2017, 2016, or 2015) and include scores in the areas of math and reading/ELA. Though you may opt to include them, College Board SAT/PSAT scores (item 6) are not acceptable in lieu of achievement test scores.

Do not delay submitting your application to wait for more recent test scores. Include whatever acceptable test scores you have from the last three years.

If you have not taken a standardized achievement test in the past three years, include a signed note with a school stamp from an administrative staff person at your school indicating so.

5. Academic Product or Essay

Please submit an academic product that meets the criteria of one of the following three options (A, B or C) . This work should be one of which you are especially proud and which was completed since September 2017. While the work may have been done for a school assignment, it need not have been. The product you submit need not be in the same subject area as that to which you are applying, but keep in mind that the written component must develop your own original thinking beyond restating facts.
your product is more than one page, staple the pages together, but do not staple them to the application or put them in a folder.

**OPTION A.** Submit an essay or story of at least 500 words that shows your original thought and that is long enough for you to develop your ideas. A social studies or science report is **not** appropriate unless it relies heavily on your own analysis in addition to reporting factual information.

**OPTION B.** If you’d like to submit a piece of academic work that deviates from a traditional essay or story format (e.g., art, poetry, computer programs, and science experiments), you must also submit a clear, well-developed explanation of your work. Your written explanation should be at least 500 words and must be long enough to clearly demonstrate your thinking as you developed this product.

**OPTION C.** Write a well-developed essay of no more than 1,500 words on one of the topics below. You may type or write in ink on lined paper. Take time to consider the topic in depth and organize your answer. Be sure to title your essay.

1. If you could dedicate your life to a cause, what would it be? Imagine you are trying to convince a wealthy investor to fund your life’s work. Describe why you think your cause is worthy, how the money will be used, and what positive outcomes may result from the investment. Make sure your proposal is organized and includes factual details.

2. Identify an opinion with which you disagree or a policy that you oppose. After reviewing the other side’s evidence and reasoning, construct a persuasive essay **in favor** of the position that you do not support. Your conclusion should reflect on this exercise, stating your original understanding and how it has changed (if at all).

**6. Copy of SAT/PSAT Scores (optional)**

If available, include a legible copy of your College Board PSAT and/or SAT scores. These scores will be used for research purposes only, and they will not affect placement decisions. Note that the SAT and PSAT are aptitude tests, not achievement tests, so they are not acceptable substitutes for item 4 (previous page).

**7. Need-based Financial Aid (optional)**

See page 14 for tuition & financial aid information.

To apply for financial aid, please submit both parents’ most recent Federal Tax Return AND ALL SCHEDULES (i.e., the complete tax return) for each applicant.

For preliminary consideration and to avoid delay in submitting your application, you may submit your 2016 return if your 2017 return is not yet available. We will ask for your 2017 return at a later date, if required.

Do not send original documents.

If there are special circumstances, submit a letter of explanation and photocopies of any supporting documents (e.g., unemployment forms).

If the $50 processing fee poses a financial hardship, submit a letter of explanation and supporting documents listed above.

Send your complete application materials no later than Wednesday, February 28. We will not consider financial aid requests for applications that are completed after the financial aid deadline.

An invoice for fees due and the amount of financial aid awarded (if any) will be included in the student’s acceptance packet, which will be mailed on Thursday, March 29, 2018.

**STEP 3** Fill out the application form

Please complete the Application Information Form at atdp.berkeley.edu/apply. Students who apply online can log in to check the status of their application at any time. Returning students need only update the information on their account (e.g., address, current school) when they reapply online.

Once you have submitted the online form, print and sign the Statement of Commitment and include it with the rest of your application documents (step 2).

If you are unable to access the form online, complete the paper Application Information Form (including the Statement of Commitment) attached between pages 10 and 11. Online services will be unavailable to those who submit the hardcopy form.

CONTINUED ON NEXT PAGE
If admission is based on academic preparedness, why is applying early so important?

Applications are considered in the order in which they are completed. For the most competitive courses, there are always more qualified applicants than the program can accommodate. Highly qualified applicants who apply early have the best chance of being placed in their preferred courses at their preferred meeting times.

I didn’t learn as much as I would have liked in my math class this year. Can I repeat a math class at ATDP that I have already taken at my regular school?

No, we do not allow ATDP students to repeat math classes. Instead, we suggest that you consider taking a 5-unit math elective for which you have completed the prerequisites or a course in another field of study.

How are financial aid awards determined?

Financial aid awards are based on total family resources, determined in part by tax returns and schedules. We make every effort to help families with limited resources; however, we are often unable to offer full financial aid, and families who receive full financial aid for tuition will still need to pay the course facilities fee.

A drastic change in my financial situation is not reflected on my tax return. What should I do?

Attach a letter explaining your situation, as well as any supporting documents (e.g., unemployment forms) to the tax forms you send in.

# Application Information Form

**2018 Secondary Division (Grades 7-11)**

---

**Note:** Please review the application instructions on pp. 16-20 before completing this form. In order to have a complete application, you must submit all five required supporting documents indicated in these instructions.

We highly recommend that you register on our website and submit this information online at atdp.berkeley.edu/apply (required for Early applications). If necessary, you may complete and attach this paper form instead. Please print all information in black or blue ink. Applicants who submit hardcopy information will not be able to access online services.

---

**TWO CONCURRENT COURSES - RESTRICTIONS APPLY**

- [ ] I am petitioning to take two courses AND I have explained my request in my Letter of Interest (Application Item 5).

**Recommended for returning students only**

---

**Nondiscrimination statement.** The University of California, in compliance with Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and the Age Discrimination Act of 1975, does not discriminate on the basis of race, color, national origin, sex, handicap, or age in any of its policies, procedures, or practices; nor does the University discriminate on the basis of sexual orientation. This nondiscrimination policy covers admission and access to, and treatment and employment in, University programs and activities, including but not limited to, academic admissions, financial aid, educational services, and student employment.

---

**Research participation.** ATDP has a responsibility to conduct research that contributes new knowledge that leads to growth and improvement in our understanding of how academically talented students learn and how they can be better served. We ask our students and their families to assist in this effort by contributing between 1 and 3 hours per year to participating in this research. However, opting not to participate in research will in no way affect admission into the program. Before a student can participate in a study, ATDP gives detailed information about it to the student and his or her parent(s) and obtains their informed consent in writing.

---

**Contact.** For direct communication, ATDP attempts to contact families first by email, then by phone, then by post mail if necessary. ATDP collects student email addresses for the sole purposes of (1) notifying parents and students of their application status, (2) sending program news and announcements, (3) providing them to instructors to facilitate communications regarding coursework during the summer program, (4) requesting feedback about the student’s experiences involving the program, and (5) informing students of research participation opportunities. Students are not required to provide an email address; ATDP will instead use the parent’s email address for messages intended for the student.

---

**CONTINUE ON REVERSE**
III. Biographical Data

In order to help us develop a greater base of knowledge about our student population, please complete the questions below.

*Your responses in this section will not affect your admission status or course placement.*

1. Please indicate your ethnic background by checking ALL that apply.
   - American Indian/Alaskan Native
   - Latino/Other Hispanic-American
   - African-American/Black
   - Pacific Islander
   - Mexican/Mexican-American/Chicano
   - Japanese/Japanese-American
   - Filipino/Filipino-American
   - Chinese/Chinese-American
   - Vietnamese/Thai/Other Asian
   - White/Caucasian (& Middle Eastern)
   - Other (please indicate): ______________________
   - Decline to state

2. Which language(s) did you speak first?
   - English
   - Another language (specify): ______________________

3. In what country were you born?
   - USA
   - In another country (specify): ______________________, and I came to the USA in the year _________.

4. Please indicate the highest level of education completed by each parent by writing the corresponding letter in each space.
   - Elementary school
   - Some high school
   - High school diploma or equivalent
   - Business or trade school
   - Some college
   - Associate or two-year degree
   - Bachelor’s or four-year degree
   - Some graduate or professional school
   - Graduate or professional degree
   - Completed by mother (or parent/guardian 1)
   - Completed by father (or parent/guardian 2)

5. Please indicate the approximate income of your parents last year.
   - Less than $10,000
   - $10,000 - $25,000
   - $25,000 - $50,000
   - $50,000 - $75,000
   - $75,000 - $100,000
   - $100,000 - $150,000
   - $150,000 - $200,000
   - Over $200,000

IV. Financial Aid

Are you applying for need-based financial aid?  
- Yes
- No

Yes, and I have included my family’s most recent Federal Tax Return and all Schedules (i.e., the complete tax return).

V. Statement of Commitment

All students and parents must agree to and sign the following statement of commitment prior to admission into ATDP.

“I understand that students may be dismissed from the Program without refund because of absences, failure to complete assignments, or behavior involving academic dishonesty or interpersonal interactions that is unfitting to the purpose of the Program.”

______________________________  ________________________________
Signature of Student Applicant  Signature of Parent or Guardian
(Student MUST sign)            (Parent MUST sign)

Remember: your application is NOT COMPLETE without all required items!
See list and instructions on pp. 16-20.

</tbody>
</table>

Apply as early as possible. Applications are considered for acceptance and course placement in the order they are completed.
Dear Applicant and Family,

Fill out the information at right, then provide the form to your teacher with an envelope. Remember that your teacher’s time is valuable. We recommend giving your teacher this form at least one week before you plan to submit it with your application. Do not request a separate letter of recommendation. Do not submit more than one Teacher Review Form with your application materials.

Dear Teacher,

You are receiving this form because your student is applying to the Academic Talent Development Program (ATDP), a UC Berkeley summer program which offers challenging classes for highly motivated students. For your reference, your student has indicated their application postmark deadline above. More information about the program can be found at atdp.berkeley.edu.

Please,

1. complete the information at right and both parts on the second page of this form,
2. seal the form in an envelope* and sign your name across the seal on the envelope’s flap, and
3. return the sealed envelope to the student.**

Make any inquiries at atdpoffice@berkeley.edu or 510-642-8308. Your insights and recommendations are carefully considered. Thank you very much for your feedback and assistance.

</tr>
</tbody>
</table>

* check “NA” if there has not been an opportunity to observe this behavior

3. Comments

a. Please include comments, examples, or concerns regarding this student’s academic or creative abilities. We particularly value specific observations. Please write concisely in the space below—ATDP does not review separate letters of recommendation.

b. Please comment on any supports this student uses at school (language proficiency needs, accommodations or modifications, etc.).
